

Cohort construction (final workbook)

Symmetric 180-day washout applied to both arms; data cutoff 3 September 2026

Screened IIH-coded patients and control pool

Excluded: no matched counterpart (n = 869)

Excluded at 180-day washout / no follow-up after day 180 (n = 734)

Final matched cohort: 2,618 IIH cases + 9,122 controls

Analysed at 3 years: 115 incident seizures (60 IIH, 55 control)
